

module-1, Q1

i) Use Parallel Structures to Link Ideas, Sentences, and Paragraphs

- ▶ Parallelism is the use of matching words, phrases, clauses, or sentence structures to express similar ideas. Parallel structures allow the reader to flow smoothly from one idea, sentence, or paragraph to the next and to understand the relationships and connections between ideas.
- ▶ Example: Usually, the children spend the summer weekends **playing** ball in park, **swimming** in the neighbor's pool, **eating** ice cream under the tree, or **camping** in the backyard.
- ▶ At the museum, the class **attended a lecture where the speaker demonstrated** how the Native Americans made bows and arrows. They also **attended a lecture where a sword smith demonstrated** how the Vikings crafted swords.

Main or Independent Clause

"Main (or independent) clause is a clause that expresses a complete thought and can stand as a sentence.

Examples

I met the boy who had helped me.

She is wearing a shirt which looks nice.

The teacher asked a question but no one answered.

He takes medicine because he suffers from fever.

He became angry and smashed the vase into peaces.

In the above sentences each underlined part shows main clause. It expresses complete thought and can stand as a sentence that is why a main or an independent clause is normally referred as a simple sentence.

Subordinate or dependent Clause

Subordinate (or independent) clause is a clause which does not express complete thought and depends on another clause (main clause) to express complete thought. Subordinate clause does not express complete idea and can't stand as a sentence. A sentence having a subordinate clause must have a main clause.

Example

He likes Chinese rice which tastes good.

The clause "which tastes good" in above sentence is a subordinate clause because it does not express complete thought and can't stand as a sentence. It depends on main clause (he likes Chinese rise) to express complete thought.

Examples.

I met the boy who had helped me.

I bought a table that costs \$ 100.

He takes medicine because he suffers from fever.

Q-3 Punctuation Marks

In the English language, there are fourteen main punctuation marks, all of them. Some punctuation marks, such as the full stop and quotation, have more than one name among English speakers.

1. Full Stop / Period (.)
2. Comma (,)
3. Question Mark (?)
4. Exclamation Mark (!)
5. Quotation Marks / Speech Marks (" ")
6. Apostrophe (')
7. Hyphen (-)
8. Dash (– or —)
9. Colon (:))
10. Semicolon (;)
11. Parentheses ()
12. Brackets []
13. Ellipsis (...)
14. Slash (/)

Q-4

Phrase

Phrase

"A phrase is defined as a group of related words that lacks both subject and verb."
A phrase is a part of a sentence. It is a group of words (within a sentence) that does not contain both subject and verb, and does not express a complete idea.

Example.

He is standing **near a wall**.

The part of above sentence "near a wall" is a phrase because it does not contain subject and verb, and does not express a complete idea.

A phrase does not include both subject and verb at a same time and does not make a complete sense, hence a phrase cannot stand as a sentence on its own.

ex-phrase

es

He always behaves **in a good manner.**

They were shouting **in a loud voice.**

She always drives **with care.**

He sat **in a corner of the room.**

He returned **in a short while.**

Q-2

define cliches with few examples

A **cliché** is a phrase, expression, or idea that has been overused to the point of losing its original impact, meaning, or novelty. Often considered unoriginal or lazy writing, these trite, predictable sayings frequently appear in speech and media. Synonyms include **platitude**, **banality**, **commonplace**, or **stock phrase**. Grammarly +4

Common Cliché Examples

- **"Actions speak louder than words"** (What you do is more important than what you say).
- **"At the end of the day"** (Used to summarize the final point).
- **"Every cloud has a silver lining"** (There is something good in a bad situation).
- **"It is what it is"** (A phrase that ends

Module-3, Q-1

3. Classifying

- **Definition:** Classifying involves organizing items, concepts, or ideas into categories based on shared characteristics.
 - **Key Steps:**
 - Identify the **main concept** or topic.
 - Determine the **criteria** for classification.
 - Group items into **categories or subcategories**.
 - **Purpose:** To simplify understanding by organizing complex information.
 - **Example:**
 - Animals can be classified into:
 - **Mammals** (e.g., humans, lions, whales),
 - **Reptiles** (e.g., snakes, turtles, lizards),
 - **Birds** (e.g., parrots, eagles, penguins).
-

Q-2

1. Defining

- **Definition:** A definition explains the meaning of a term, concept, or phenomenon. It states what something **is** by identifying its essential characteristics.
 - **Key Elements:**
 - **Term/Concept:** The subject being defined.
 - **Class/Category:** The broader group to which the subject belongs.
 - **Differentiating Features:** What makes the subject unique from others in the category.
 - **Purpose:** To clarify meaning and avoid confusion.
 - **Example:**
 - *A triangle is a **polygon** (category) with **three sides and three angles** (differentiating features).*
-

Q-3

2. Describing

- **Definition:** Describing involves explaining the features, characteristics, or attributes of a subject. It answers the questions **what, how, when, where, or why**.
- **Types of Description:**
 - **Objective:** Focuses on factual and observable details.
 - **Subjective:** Includes personal opinions, emotions, or interpretations.
- **Purpose:** To create a clear mental picture for the audience.
- **Key Techniques:**
 - Use sensory details (sight, sound, touch, taste, and smell).
 - Use adjectives, comparisons, and vivid language.

Q-4

short essay on study skills for success

ಕನ್ನಡ

Effective study skills are essential for academic success and lifelong learning, transforming passive reading into active understanding. Key techniques include time management, structured note-taking (e.g., Cornell Method), and active recall, which improve retention. Implementing strategies like spaced repetition and organized routines reduces stress and boosts performance, allowing students to learn smarter rather than just longer. Slideshare +1

The Foundation of Effective Study

Study skills are techniques used to enhance understanding, organize information, and retain knowledge, moving beyond mere memorization. PlanetSpark

- **Time Management:** Organizing a study schedule helps reduce procrastination, balancing academics with personal life, and reducing stress.
